rpg maker mv - heroine character generator. rpg maker mv heroine character generator download

Good DLC that adds some more variety to the Female category of your Character generator. There are no changes or add ons to the Male category or Kid one. Hence the Title "Heroine." Mainly it is some unique hairstyles, some variant eyes that have different default color to them and lots of clothing additions. Mainly a couple of School Uniform ones and a lot of Fantasy/Princess type. I have not had time yet to battle test or map test each variant of the generator parts, but for the most part they are good looking quality and for the price compared to how long it would take you to design this stuff yourself, I'm good with the variety provided. Would love to see more modern stuff like blue jeans and jerseys for up to date casual wear, but I'm into modern RPGs so that's an "opinionated" request. Would also love to see some more stuff for the guys and kids too in the future! (Hint Hint) Readers: Don't forget this pack allows you to make the face, SV battler, dead, and sprite all with this DLC. This is not premade characters so sky is the limit what you do with the parts.. I like this pack a lot, especially the clothes but the new hair and eyes don't really match the rest of the generator pieces so it'll make it hard to mix and match. Other than that little warning I would recommend this to anyone looking for some new parts.
